Mounir Mostafa Mostafa Mohamed

Computer and Information Student | AI & Machine Learning

Ismailia, Egypt • 01200276750 • monermostafa2007@gmail.com
linkedin.com/in/mounir-mostafa-28417938a • Expected Graduation: 2029

PROFILE

Second-year Computer and Information student at Suez Canal University with a foundation in C++ programming and hands-on practice in Python-based data analysis and machine learning. Completed ITI's 135-hour AI and Machine Learning Foundations Level 1 program, covering data preparation, machine learning, neural networks, and deep learning. Interested in developing practical AI/ML projects and continuing to strengthen programming and analytical skills.

EDUCATION

B.Sc. in Computers and Information — Suez Canal University

Second-Year Student | Expected Graduation: 2029

TECHNICAL SKILLS

Programming	C++, Python fundamentals
Data & ML	NumPy, Pandas, data cleaning, exploratory data analysis, feature engineering
Machine Learning	Scikit-learn, regression, classification, Random Forest, model evaluation
Deep Learning	TensorFlow/Keras fundamentals, neural networks, CNN concepts
Core CS	Problem solving, arrays, strings, functions, loops, conditionals, pointers, basic algorithms

PROJECTS

House Price Prediction | Python, Pandas, Scikit-learn

- Cleaned and prepared a housing dataset, handled missing values, engineered features, and treated price outliers.
- Built and evaluated Linear Regression and Random Forest regression pipelines using MAE, RMSE, and R^2.

Titanic Passenger Survival Prediction | Python, Pandas, Scikit-learn, Kaggle

- Prepared passenger data for binary classification, handled missing values, encoded categorical features, and explored family-size feature engineering.
- Practiced model training and evaluation in the Kaggle Titanic competition; reported score: 0.79888.

C++ Programming Exercises

- Developed small programs including a calculator, array maximum/minimum finder, even/odd checker, and student grade management.

CERTIFICATIONS & TRAINING

AI and Machine Learning Foundations – Level 1 | Information Technology Institute (ITI)

September 2026 • 135 training hours • Topics included AI fundamentals, Python/NumPy, probability and statistics, linear algebra, data preparation, machine learning, neural networks, deep learning, and a final project/demo.

Python Course Certificate | Completed May 2026 • Duration: 1 hour 38 minutes

Note: Add GitHub links and the ITI final-project title only after confirming the public URLs and exact project details.
